

A Brilliant Idea to Integrate the Structured Network

- 125570 Fiber Optic Keystone Adapter – LC Duplex
- 125571 Fiber Optic Keystone Adapter – ST Simplex
- 125572 Fiber Optic Keystone Adapter – SC Simplex

equip® launches a series of Fiber Optic Keystone Adapter to fulfill the demand where a combination of copper and fiber optic components is needed. These pre-assembled keystone adapters are compatible with standard keystone patch panels, outlets, and surface mounted boxes, making it easy to establish a neat and flexible connection.

For a 19" network installation, the equip® 24-Port Keystone Patch Panel is recommended. It is compatible to these fiber optic keystone adapters as well as the **Cat.6 Keystone Jacks** (769110 and 769111) and **Inline Couplers** (125479). For spare ports, a **Blind Insert** (760401) serves well to cover the cavity. These components altogether collaborate a total solution for the structured network.
