- Easy switching between computers with keyboard hotkeys/front panel push button
- Windows and Mac switching software support
- Self powered through USB connection
- Independent/simultaneous switching of PC and audio/mic channel
- Provides auto-scanning features and audio support

Description

Product OverviewThe KVM-0422 4-Port USB KVM Switch from LevelOne offers users with an easy to install KVM switch that can manage four computers from a single monitor, keyboard and mouse. It allows users to access, control, boot and reboot four USB-enabled multimedia computers using a single USB keyboard, mouse and monitor.

Flexible Multi-Computer Management FeatureUsers are now offered with flexible multi-computer management support. The KVM-0422 offers users with user-programmable simultaneous or independent PC and audio switching. This enables users to work on one computer while simultaneously using the other computers for work or fun. The KVM-0422 supports PC and Macintosh (MAC G3, G4, iMAC) platforms.

One Keyboard, Mouse and Monitor controlling Two ComputersThe LevelOne KVM-0422 connects four computer systems to a single USB keyboard, USB mouse and monitor. The KVM-0422 is a Plug-and-Play KVM switch that requires no power supply and no additional software installation. Users simply connect the KVM switch to the USB mouse and keyboard and screen ports on each by using the included cables.

Easy to Switch between ComputersThe KVM-0422 switches between computers either through the push buttons located on the switch or by using keyboard hot keys. The KVM switch includes a Windows and Mac based utility allowing users to select and monitor active PCs from their desktop as well as to configure the keyboard hotkeys for easy switching between computers. The KVM-0422 further supports hot-plugging for easy maintenance of computers without shutting down the KVM switch or the computer. The LED display offers an "at-a-glance" status display for easy computer activity assessment.
